Technical specification

1- **The 125mm round posts** are made of laminated timber, which have not been treated with chrome or arsenic. Splinter-free, the laminate provides great strength and dimensional stability. The posts are protected from wear and tear caused by fungi, insects and termites.

2- **The platforms and climbing walls** are 22mm thick panels made up of alternating layers of birch. The surface is coated with a film of anti-slip phenolic resin.

3- **The tubes** are made of stainless steel guaranteeing lasting durability and reliability of the equipment.
Injection moulded polyamide fixings connect the posts to the platforms and the various play features.

4- **The ropes** are made of galvanised steel cable covered with polypropylene. Injection moulded polyamide connectors link the cables and keep the nets in shape.

5- **The climbing holds** are made of polyamide for its strength and rigidity.

6- **The sleeves** allow the posts to be raised from the ground surface, ensuring preservation of timber. These sleeves are made of galvanised steel sheets. The lower portion of the sleeves are buried below ground level.

7- **The fixings** are made of stainless steel and are protected by polyamide anti-vandal caps.
